### **CNA Bologna**

CNA, the National Confederation for the Craft Sector and Small and Medium Enterprise, represents Craft Businesses and small and medium enterprises.

It associates 16,000 companies (Craft Businesses, SME, Workers on Contract, Self-employed Professionals, Trades) which produce over 3-billion-euro turnover and employ 47,000 people.

CNA Bologna has 1 provincial Head Office, 40 branches located on the local territory, 10 affiliated companies, 10 Business Associations, 22 Consortia. 400 Member Entrepreneurs are engaged in the Board of Directors and the employees are over 700.

It represents the interests of Craft Businesses, SMEs and experts in public and private institutions, in the Public Administration, and in political, social and economic organizations. It offers a wide range of services, ranging from financial and fiscal assistance to strategic consultancy; it also promotes the economic development and invests together with its member enterprises in high added value projects for their economic development.

CNA Bologna participates in the Chamber of Commerce and has its own representatives in the local and regional Craft Commissions and in the most important Economic Bodies of the territory. [www.cna.bo.it](http://www.cna.bo.it)

### **PERA Technology**

Every year, Pera Technology helps hundreds of companies across Europe and beyond to harness the potential of science and technology to create new and valuable products and processes to create sustainable, valuable businesses. They use in-house resources to boost their businesses, work together to create innovative ideas, and hook them up with world-class scientists, commercial partners to make the idea a reality and source grants or other financial support from the best funding providers.

Over the past decade, they have oiled the wheels of at least 600 innovative technology projects, with a market value of around £20 billion. [www.pera.com](http://www.pera.com)
